## MARK SCHEME for the October/November 2010 question paper for the guidance of teachers

## 0610 BIOLOGY

0610/62
Paper 6 (Alternative to Practical), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- CIE will not enter into discussions or correspondence in connection with these mark schemes.

CIE is publishing the mark schemes for the October/November 2010 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

| Page 2 | Mark Scheme: Teachers' version | Syllabus | Paper |
| :---: | :---: | :---: | :---: |
|  | IGCSE - October/November 2010 | $\mathbf{0 6 1 0}$ | $\mathbf{6 2}$ |

| Questions | Mark Scheme |  | Guidance/comments |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 (a) | unripe fruit - smaller / seeds white freshly harvested - larger / seeds getting darker stored, <br> ripe fruit - wrinkled /darker in skin colour/ seeds darker;;; |  |  | small | middle | large |
|  |  |  | number of seeds | 1 | 1 | 3 / more |
|  |  |  | colour of seeds | white | white | dark / black |
|  |  |  | size of seeds / maturity | small / immature / underdeveloped | larger / more mature / developed | larger / mature / developed |
|  |  |  | core / middle region / aw | undeveloped | developing | developed/ larger |
|  |  |  | sepal / stigma / <br> style / flower remains | present | less clear | smaller / shrivelled / aw |
|  |  |  | fleshly wall / mesocarp | thin | developing | thicker |
|  |  |  | skin / epicarp / outer layer | outer covering of young fruit/ aw | thin / pale | thicker / darker |
|  |  | [max 3] | I. ref to petals/anthers <br> A. relevant comment not linked to a particular stage. <br> I. comments on roots / leaves / stalk / cell wall. <br> I. seeds - growing as confused with germination. <br> I. comment on size of apple as instructed in question. |  |  |  |

| Page 3 | Mark Scheme: Teachers' version | Syllabus | Paper |
| :---: | :---: | :---: | :---: |
|  | IGCSE - October/November 2010 | 0610 | 62 |

| (b) | ```one safety feature - max; starch iodine solution; black if starch present; reducing sugar make solution / AW; add Benedict's solution; heat; green / yellow / orange / red; [int max 3]``` | [max 5] | Water bath / tongs / lab coat / hair tied back. <br> I. gloves. <br> A. drops of iodine / iodine in KI. <br> A. black / purple / blue I. heating / ethanol. <br> A. make an extract / chopping up and adding water / AW <br> A. Fehlings / Clinistix. <br> I. warm <br> Must match reagent used. Clinistix purple / dark blue for positive. <br> I. brown alone. A. red / reddish brown. I. use of ethanol. <br> If used biuret reagent - do not award marks for reducing sugar. |
| :---: | :---: | :---: | :---: |
| (c) (i) | 66.3 <br> 93.5 <br> 109.5 | [1] | All correct $=1$ <br> If 30.5 / 27.2 / 16.0 - no mark but e.c.f. for plot. |
| (ii) | A - axes and labels and orientation; <br> S - scale - suitable to fill more than half the grid and even; <br> P - plot; <br> L- line; <br> Score marks by a series of $\sqrt{ }$ or X in order. | [4] | $x$-axis - time in days and $y$-axis - loss in mass (of apples) /g If plot mass -2 nd column in error Allow $S$ and $L 2$ MAX. <br> Non-linear scale A only. <br> Allow +/- half a small square. Must plot zero. <br> For those who plot only the last 3 values: <br> Allow $\mathrm{A}, \mathrm{S}$ and $\mathrm{L}=3$ max. <br> Allow line of best fit - if correct and balanced plots each side of the line. Allow a smooth curve but not if 'sagging' and too thick to identify points. <br> Allow points joined by ruled lines. No extrapolation. <br> Histograms / bar charts allow A, P and neatness = 3 max. Allow label for columns in the middle not to one side. |

| (iii) | respiration / fermentation / oxidation; transpiration / evaporation / dehydration / water loss / drying; decomposition / decay / action of microbes / rotting / AW; | [max 2] | Allow aerobic and anaerobic respiration. A. excretion of $\mathrm{CO}_{2}$ I. reduction / metabolic reactions/ / hydrolysis. <br> I. eating / osmosis. |
| :---: | :---: | :---: | :---: |
| (iv) | 1. keep in cooler conditions / in a fridge / not too hot / AW ; <br> 2. cover apples / wrap apples; <br> 3. keep in the dark or out of sunlight; <br> 4. under different gases / nitrogen / carbon dioxide/ less oxygen / air tight / vacuum; <br> 5. keep separated / cushioned / AW; <br> 6. keep away / separated from ripe fruits; | [max 3] | R. freezer <br> R. use of plastic bags / cellophane / clingfilm. A. paper / foil. <br> Idea to prevent bruising. <br> I. moist or dry conditions / well ventilated / wash and disinfect / pesticides / preservative / antioxidants. |
| [Total: 18] |  |  |  |

| :---: | :---: | :---: | :---: |
|  | IGCSE - October/November 2010 | 0610 | 62 |

| 2 (a) | drawing: O clear outline and no heavy shading; <br> S equal size but not smaller than 6 cm ; <br> D both valves and hinge; <br> ONE label: hinge / joint / ligament / shell / exoskeleton / muscle attachment / AW; | [4] | Allow stippling but not blocked in shading <br> I. thick wall / covering / coat / epidermis / testa / outer layer. Score marks by a series of $\sqrt{ }$ or X in order for drawing but tick by correct / accepted label. |
| :---: | :---: | :---: | :---: |
| (b) | protective / camouflage / shelter / safety /hide; hard / tough/ rigid / thick / heavy; from predators / being eaten / attacked / prevent drying out / pressure or waves or depth of water / current; | [max 2] | A. if this is implied |
| (c) (i) | mollusc; <br> size in Fig. 2.2 ......38...(.mm); NB length. <br> scale is $3 \mathrm{~mm}=25 \mathrm{~mm}$ - part of working; <br> actual size $=\frac{38 \times 3}{25}=4.56 \mathrm{~mm}$ or 0.456 cm ; <br> 4.6 | [1] | A. close spelling <br> A. $+/-1 \mathrm{~mm}$ for length $37-41 \mathrm{~mm}$ <br> From diagram check if width has been measured in error. ecf. <br> Accept correct word formula = one mark <br> Accept actual size in range of $4.4-4.8 \mathrm{~mm}$ <br> Allow correct measurement in cm . <br> If correct answer - but no working shown $\sqrt{ } \sqrt{ }=2$ |
| [Total: 10] |  |  |  |

| Page 6 | Mark Scheme: Teachers' version | Syllabus | Paper |
| :---: | :---: | :---: | :---: |
|  | IGCSE - October/November 2010 | $\mathbf{0 6 1 0}$ | $\mathbf{6 2}$ |

| 3 (a) | feature <br> shape <br> surface area <br> number <br> leaf stalk / <br> petiole <br> veins | submerged <br> leaves <br> thin / narrow / <br> elongated / <br> divided / <br> branched / ORA <br> small <br> 2 / less / fewer <br> not present / leaf attached <br> none / not visible | floating leaves <br> broad / entire / undivided / ORA <br> large <br> 3/more present / long <br> present / network | [max 2] | Descriptions appear either in table form or all text and run together - dredge. <br> They / it = submerged leaves. <br> I. reference to flowers. <br> Answer does not have to be comparative. A. description of one type of leaf. <br> Award correct biology. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| (b) (i) | palisade mesophyll; spongy mesophyll; | label lines or | rackets | [2] | Row of cells below the upper epidermis to top of air spaces. Exclude the lower epidermis but from boundary of large air spaces. Do not accept vascular bundle in the centre. Label lines can be to one cell or to an air space rather than a bracket. Check the names are not inverted. Independent label marks |
| (ii) | palisade mesophyll: <br> spongy mesophyll : | more light/ more chloroplasts / mo arrangement of surface; <br> photosynthesis; <br> air spaces / air g less light/ less ch chlorophyll; photosynthesis: gas / $\mathrm{CO}_{2}$ / wate air circulation / | or lots of e chlorophyll; ells near upper <br> ps; oroplasts / less <br> vapour / oxygen / s exchange; | [max 3] | A. 'middle tissue' as spongy mesophyll. <br> Photosynthesis only once <br> Not separated by naming the tissue - then A. correct references to photosynthesis / gas exchange / air spaces for MAX 2 <br> I. reference to vascular tissue. |

| (c) | animal tube: <br> colour - yellow; <br> explanation - giving off / producing / releasing $\mathrm{CO}_{2} /$ <br> high $\mathrm{CO}_{2} /$ carbonic acid; <br> from respiration; |
| :---: | :--- | :--- | :--- |
| waterweed tube: <br> colour - purple; <br> explanation - low $\mathrm{CO}_{2} / \mathrm{CO}_{2}$ used up / taken in / AW; <br> by photosynthesis; | Read the whole answer - the colour may change during the <br> answer to final colour at the end of account. <br> Independent marking. <br> I. becomes acid. <br> I. any references to oxygen. I. references to breathing. |
| [max 5] |  |
