

SET THEORY-2

1

Three sets A, B and K are such that $A \subset K, B \subset K$ and $A \cap B = \emptyset$.
Draw a Venn diagram to show this information.

[2]

2

(a) Shade the region $A \cap B$.

[1]

(b) Shade the region $(A \cup B)'$.

[1]

(c) Shade the complement of set B .

[1]

3

A and B are sets.
Write the following sets in their simplest form.

(a) $A \cap A'$.

Answer(a) [1]

(b) $A \cup A'$.

Answer(b) [1]

(c) $(A \cap B) \cup (A \cap B')$.

Answer(c) [1]

4

The Venn diagram shows the number of elements in each set.

(a) Find $n(P' \cap Q)$.

Answer(a) [1]

(b) Complete the statement $n(\dots) = 17$.

[1]

5

(a) $n(\mathcal{E}) = 10$, $n(A) = 7$, $n(B) = 6$, $n(A \cup B)' = 1$.

(i) Complete the Venn diagram by writing the number of elements in each subset. [2]

(ii) An element of \mathcal{E} is chosen at random.

Find the probability that this element is an element of $A' \cap B$.

..... [1]

(b) On the Venn diagram below, shade the region $C' \cap D'$.

[1]

6

(a) $Q = \{1, 2, 3, 4, 5, 6\}$

Write down a set P where $P \subset Q$.

$P = \dots\dots\dots$ [1]

(b) Shade these regions in the Venn diagrams.

[2]
