0653/31

Paper 3 (Extended)

October/November 2010

1 hour 15 minutes

Candidates answer on the Question Paper.

No Additional Materials are required.

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs, tables or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO **NOT** WRITE IN ANY BARCODES.

Answer **all** questions.

A copy of the Periodic Table is printed on page 20.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

For Examiner's Use

This document consists of **19** printed pages and **1** blank page.

- 1 Fig. 1.1 shows a rock that is falling from the top of a cliff into the river below.

0653/31/O/N/10

For
Examiner's
Use

Fig. 1.1

- (a) The rock accelerates downwards at 10 m/s^2 . The mass of the rock is 4 kg .

Calculate the force pulling the rock downwards.

State the formula that you use and show your working.

formula used

working

..... [2]

- 1 (b) Fig. 1.2 is speed-time graph for the motion of the rock. This graph ignores the effects of air resistance on the rock.

0653/31/O/N/10

Fig. 1.2

Calculate the height of the cliff.

Show your working.

For
Examiner's
Use

..... [2]

- 1 (c) The rock has an irregular shape.

0653/31/O/N/10

Describe how you could find the density of an irregularly shaped object such as a rock. You should state the apparatus you would use and the measurements you would need to make.

.....
.....
.....
.....
..... [4]

- 1 (d) The rock contains radioactive substances emitting high levels of ionising radiation.

- (i) State how the radioactivity could be detected.

0653/31/O/N/10

..... [1]

- (ii) Explain why it would be dangerous for a person to handle this rock without proper protection.

0653/31/O/N/10

.....
..... [1]

2 The gray wolf is a predator that lives in North America.

- (a) In Wisconsin, Canada, the wolves' diet consists mainly of white-tailed deer, beaver, and snowshoe hares. These all eat plants.

0653/31/O/N/10

- (i) Construct a food web including all the organisms mentioned above.

[3]

- (ii) State what the arrows in your food web represent.

0653/31/O/N/10

[1]

- (iii) With reference to your answers to (i) and (ii), suggest why wolves are rarer than white-tailed deer.

0653/31/O/N/10

[2]

- 2 (b) People used to shoot gray wolves, because the wolves kill sheep on farms and deer that people like to hunt.

0653/31/O/N/10

For
Examiner's
Use

In 1978, a conservation programme for gray wolves began in Wisconsin and people were no longer allowed to shoot them.

Some people in Wisconsin are opposed to the wolf conservation programme.

Discuss the arguments for and against conserving the gray wolf.

.....

.....

.....

.....

.....

.....

.....

..... [3]

- 3 (a) Copper metal reacts with oxygen gas to form copper oxide. Table 3.1 shows information about two different types of copper oxide.

0653/31/O/N/10

For
Examiner's
Use

Table 3.1

| name | colour | chemical formula |
|------------------|--------|-------------------|
| copper(II) oxide | black | CuO |
| copper(I) oxide | red | Cu ₂ O |

- (i) Copper is a transition metal.

State **one** property, shown in Table 3.1, which is typical of transition metals.

..... [1]

- (ii) The formula of the oxide ion is O²⁻.

0653/31/O/N/10

Use the formula of copper(I) oxide to deduce the charge on the copper ion in this compound.

Show your working.

.....
..... [2]

- 3 (b) Fig. 3.1 shows apparatus used in the electrolysis of copper chloride solution.

0653/31/O/N/10

For
Examiner's
Use

Fig. 3.1

- (i) On the diagram, label clearly the **anode** and the **electrolyte**. [2]
- (ii) Copper chloride solution contains copper ions and chloride ions.

When the switch in Fig. 3.1 is closed, bubbles of chlorine gas form at the anode and copper metal forms at the cathode.

Explain these observations in terms of ions, electrons and atoms.

0653/31/O/N/10

.....

.....

.....

.....

.....

..... [4]

- 4 (a) Fig. 4.1 shows a ray of light hitting a mirror. The angle of incidence is 50° .

0653/31/O/N/10

For
Examiner's
Use

Fig. 4.1

On Fig. 4.1

- (i) use a ruler to draw and label the reflected ray, [1]
- (ii) use a ruler to draw and label the normal, [1]
- (iii) label the angle of incidence. [1]

- 4 (b) Fig. 4.2 shows the wave traces made by three sounds.

0653/31/O/N/10

trace A

trace B

trace C

Fig. 4.2

- (i) On the grid below, draw the trace of a sound wave which has twice the frequency of trace A.

[1]

- (ii) On the grid below, draw the trace of a sound wave which has half the amplitude of trace A.

[1]

- (iii) Which two traces in Fig. 4.2 show sounds with the same loudness?

[1]

- 5 In jet engines, hydrocarbon molecules from the jet fuel mix with air and burn. This releases a large amount of energy and produces a mixture of waste gases. These waste gases pass out through the back of the jet engine into the atmosphere.

0653/31/O/N/10

For
Examiner's
Use

- (a) Fig. 5.1 shows a molecule of octane, which is a typical hydrocarbon molecule in jet fuel.

Fig. 5.1

- (i) State the chemical formula of octane.

..... [1]

- (ii) Complete the word equation below for the complete combustion of octane.

[2]

- 5 (b) Air contains the element nitrogen, N_2 .

0653/31/O/N/10

- (i) State the number of outer electrons in a single nitrogen atom.

..... [1]

- (ii) Complete the bonding diagram below to show how the outer electrons are arranged around the atoms in a nitrogen molecule.

[2]

5 (c) Table 5.1 shows information about some metallic materials.

0653/31/O/N/10

For
Examiner's
Use

Table 5.1

| material | strength | density |
|-----------------------------------|-----------------|----------------|
| mild steel | very high | very high |
| aluminium | low | low |
| duralumin (an aluminium alloy) | very high | low |

Duralumin is used in the manufacture of aircraft.

Explain why the properties of this material make it suitable for this purpose.

.....

.....

.....

.....

..... [2]

6 Fig. 6.1 shows a generalised reflex arc.

0653/31/O/N/10

For
Examiner's
Use

Fig. 6.1

(a) Name the neurones labelled **X**, **Y** and **Z**.

X

Y

Z [3]

- 6 (b) A student hears a sudden, loud bang. Receptors in his ear respond to the sound by generating electrical impulses in neurone **X**. These impulses travel along the reflex arc, eventually reaching an effector. 0653/31/O/N/10

Suggest what the effector could be in this reflex, and how it would respond.

effector

response [2]

- 6 (c) Another reflex action involves the secretion of saliva into the mouth, in response to the smell of food. Saliva contains the enzyme amylase. 0653/31/O/N/10

(i) Describe the role of amylase in the digestion of food.

.....
.....
..... [2]

(ii) Explain why it is necessary for most types of food that we eat to be digested. 0653/31/O/N/10

.....
.....
..... [2]

- (iii) On the axes below, sketch a curve to show how the activity of amylase from human saliva would vary with temperature.

0653/31/O/N/10

*For
Examiner's
Use*

[2]

7 (a) A student set up the electric circuit in Fig. 7.1.

0653/31/O/N/10

For
Examiner's
Use

It contains three lamps **L1**, **L2** and **L3**.

It contains three switches **S1**, **S2** and **S3**.

Fig. 7.1

In Table 7.1 write the words '**on**' or '**off**' to show when each lamp is lit or not lit for each set of switch positions.

Table 7.1

| switch position | | | lamp 'on' or 'off' | | |
|-----------------|--------|--------|--------------------|----|----|
| S1 | S2 | S3 | L1 | L2 | L3 |
| closed | closed | closed | | | |
| closed | closed | open | | | |
| closed | open | open | | | |

[3]

7 (b) Fig. 7.2 shows an electrical device.

0653/31/O/N/10

For
Examiner's
Use

Fig. 7.2

(i) Name the device.

..... [1]

(ii) Calculate the output voltage.

0653/31/O/N/10

State the formula that you use and show your working.

formula used

working

..... [2]

7 (c) Fig. 7.3 shows a simple a.c. generator.

0653/31/O/N/10

For
Examiner's
Use

Fig. 7.3

Describe and explain how the generator works. Your answer should refer to

- how a voltage is generated,
- why an alternating voltage is generated,
- why slip rings are used.

.....

.....

.....

.....

.....

.....

.....

.....

..... [4]

- 8 (a) Explain why plants need light for photosynthesis.

0653/31/O/N/10

For
Examiner's
Use

.....

.....

..... [2]

- 8 (b) A student fixed a piece of black paper over a leaf, which was still attached to the plant. He left the plant in the sun for two days.

He then removed the leaf from the plant and tested it for starch, after removing the black paper.

Fig. 8.1 shows the leaf before and after he did the starch test. 0653/31/O/N/10

Fig. 8.1

Complete the diagram of the leaf after testing in Fig. 8.1, using labels to show the colours of each part. Do **not** colour the diagram. [2]

- 8 (c) In daylight, plant leaves take in carbon dioxide and give out oxygen. In darkness, they take in oxygen and give out carbon dioxide.

0653/31/O/N/10

Explain why this happens.

.....

.....

.....

..... [3]

- 9 Fig. 9.1 shows the apparatus a student used to measure the rate of reaction between some powdered metal and dilute hydrochloric acid.

0653/31/O/N/10

For
Examiner's
Use

Fig. 9.1

When the student tilted the conical flask, the acid mixed with the powdered metal. Any gas which was produced collected in the test-tube, pushing the water out. The student used a stopwatch to measure the time taken for the test-tube to fill with gas.

- (a) (i) Name the gas produced when metals react with dilute acid.

..... [1]

- (ii) State the formula of the *ion* that is present in **all** dilute acid solutions.

..... [1]

- 9 (b) The student used apparatus like that in Fig. 9.1 to compare the rates of reaction between dilute hydrochloric acid and three powdered metals, **X**, **Y** and **Z**.

The results the student obtained are shown in Table 9.1.

Table 9.1

| metal | mass of metal /g | time for gas to fill the test-tube /seconds |
|----------|------------------|---|
| X | 1.0 | 154 |
| Y | 1.0 | 28 |
| Z | 1.0 | 76 |

- (i) The student was careful to ensure that the only variable (factor) which differed between the experiments was the type of metal.

State **two** variables, other than the mass and surface area of the metals, that the student must keep the same in each experiment.

0653/31/O/N/10

1

2 [2]

- (ii) Explain how the results show that the rate of reaction was the lowest when metal **X** was used.

0653/31/O/N/10

.....

..... [1]

- (iii) The student repeated the experiment with metal **Y** but this time he used a single piece of metal which had a mass of 1.0 g.

State how the rate of reaction would differ from the experiment in which 1.0 g of powdered metal was used. Explain your answer in terms of the collisions between the surface of the metal and ions in the solution.

0653/31/O/N/10

.....

.....

.....

..... [3]

- (c) When magnesium reacts with dilute hydrochloric acid, HCl , one of the products is magnesium chloride, MgCl_2 .

0653/31/O/N/10

Construct a balanced symbolic equation for this reaction.

..... [2]

BLANK PAGE

The volume of one mole of any gas is 24 dm^3 at room temperature and pressure (r.t.p.).

University of Cambridge International Examinations is part of the Cambridge Assessment Group. Cambridge Assessment is the brand name of University of Cambridge Local Examinations Syndicate (UCLES), which is itself a department of the University of Cambridge.
