

P2-MOTION-SET-2-MS

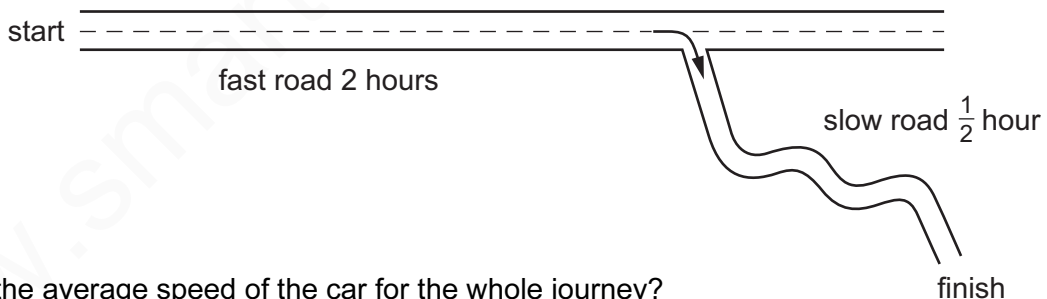

- 1** A girl rides her bicycle from home to her friend's home.
The distance/time graph for the whole journey is shown.

What is the average speed of the girl for the whole journey?

- A** 0.75 m/s **B** 1.00 m/s **C** 1.33 m/s **D** 1.50 m/s

- 2** A motorist travels 200 km.
After travelling along a fast road for 2 hours, the motorist uses a slow road for the remaining $\frac{1}{2}$ hour of the journey.

What is the average speed of the car for the whole journey?

- A** 80 km/h **B** 100 km/h **C** 400 km/h **D** 500 km/h

- 3** The circuit of a motor racing track is 3.0 km in length. In a race, a car goes 25 times round the circuit in 30 minutes.

What is the average speed of the car?

- A** 75 km/hour
B 90 km/hour
C 150 km/hour
D 750 km/hour

4

The diagram shows forces of equal size acting on a moving car.

Which speed / time graph represents the motion of the car?

5

The diagram shows the speed / time graph for a car.

During which period is the car moving at constant speed?

6 The distance/time graph represents a short journey.

Which speed/time graph represents the same journey?

- 7** A train travels along a horizontal track at constant speed. Two of the forces acting on the train are shown in the diagram.

A force of air resistance is also acting on the train to give it a resultant force of zero.

What is this air resistance force?

- A 40 000 N backwards
 - B 80 000 N backwards
 - C 40 000 N forwards
 - D 80 000 N forwards
- 8** The circuit of a motor racing track is 3.0 km in length. In a race, a car goes 25 times round the circuit in 30 minutes.

What is the average speed of the car?

- A 75 km/hour
- B 90 km/hour
- C 150 km/hour
- D 750 km/hour

9

Which graph represents the motion of an object that is accelerating?
