#### **CAMBRIDGE INTERNATIONAL MATHEMATICS**

0607/61

Paper 6 (Extended)

October/November 2014

1 hour 30 minutes

Candidates answer on the Question Paper

Additional Materials: **Graphics Calculator** 

#### **READ THESE INSTRUCTIONS FIRST**

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

Do not use staples, paper clips, glue or correction fluid.

You may use an HB pencil for any diagrams or graphs.

DO **NOT** WRITE IN ANY BARCODES.

Answer both parts **A** and **B**.

You must show all relevant working to gain full marks for correct methods, including sketches.

In this paper you will also be assessed on your ability to provide full reasons and communicate your mathematics clearly and precisely.

At the end of the examination, fasten all your work securely together.

The total number of marks for this paper is 40.

#### Answer both parts A and B.

#### A INVESTIGATION

# CUBES (20 marks)

You are advised to spend no more than 45 minutes on this part.

Identical small cubes fit together to make larger cubes.

There are no gaps between these small cubes.

For each cube that is made, a cross is marked on each **outside** face of each small cube.

The diagram shows the first three cubes that can be made.

This investigation is about the number of crosses that can be marked on cubes.

Look at the 1 by 1 by 1 cube.

It is made from 1 small cube.

It has 6 crosses on it (3 crosses are on the faces not seen on the diagram).

1 Look at the 2 by 2 by 2 cube.

(a)	How many	cmall	cubes	ic thic	cube	made	from	19
(a)	now many	sman	cubes	is unis	cune	made	iron	1 (

.....

**(b)** Explain why there are only 3 crosses on each small cube.

.....

(c) Find the total number of crosses on the 2 by 2 by 2 cube.

	2	Look at the	3	by	3	by	3	cube
--	---	-------------	---	----	---	----	---	------

(a)	How many sn	nall cubes is this	cube made from?	

•••••	•••••	• • • • • • • • • • • • • • • • • • • •	•••••

<b>(b)</b>	How many	of these sn	nall cubes	have 3	crosses	on them?
------------	----------	-------------	------------	--------	---------	----------

•••••	• • • • • • • • •	•••••	• • • • • • • • • • • • • • • • • • • •

(c)	There are 12 small cubes with 2 crosses on them.
	There is 1 small cube with no crosses on it.

How many small cubes have only 1 cross on them?

•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	٠	• •	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•	•

# 3 Complete this table.

You may use the dotty grid on page 7 to help you.

Cina Carla	Total number	Number of small cubes with										
Size of cube	of small cubes	0 crosses	1 cross	2 crosses	3 crosses							
2 by 2 by 2		0	0									
3 by 3 by 3		1		12								
4 by 4 by 4	64	8	24									
5 by 5 by 5		27	54		8							

4

(a)	To work out the	e number of crosses of	on the 3 b	by 3 by 3 cube, co	omplete the f	following.
	1	small cube with	0	crosses gives	0	crosses
		small cubes with	1	cross gives	6	crosses
	12	small cubes with	2	crosses gives		crosses
		small cubes with	3	crosses gives		crosses
				Total =		crosses
(b)	The total numb Complete the fo	er of crosses can also ollowing.	be work	ted out by the following	lowing methor	od.
	The number of	crosses on one face of	of the 3 b	y 3 by 3 cube is		
	So the total num	nber of crosses on all	the 6 fa	ces is		
(c)	Find the total n	umber of crosses on a	a 4 by 4	by 4 cube.		
(d)	Find an express	sion, in terms of $n$ , for	r the tota	al number of cross	ses on an <i>n</i> b	y <i>n</i> by <i>n</i> cube.

5 The number of small cubes with 0 crosses forms a sequence.

Size of cube	2 by 2 by 2	3 by 3 by 3	4 by 4 by 4	5 by 5 by 5	n by n by n
Number of small cubes with 0 crosses	0	1	8	27	

For an n by n cube, find an expression, in terms of n, for the number of small cubes with 0 crosses. Write your answer in the table above.

6 For an *n* by *n* by *n* cube, an expression for the number of small cubes with one cross is  $6(n-2)^2$ .

In an n by n by n cube, can the number of small cubes with 0 crosses equal the number of small cubes with one cross? Show your working.

7	For	or an $n$ by $n$ by $n$ cube, find an expression, in terms of $n$ , for the number of small cubes	with 2 crosses.
8	(a)	In an <i>n</i> by <i>n</i> by <i>n</i> cube there are 64 small cubes that have 0 crosses on them. How many small cubes does it have altogether?	
	(b)	In another <i>n</i> by <i>n</i> by <i>n</i> cube there are 60 small cubes that have 2 crosses on them. In this cube, how many small cubes have only 1 cross on them?

### **B** MODELLING

# FISH PONDS (20 marks)

You are advised to spend no more than 45 minutes on this part.

Volume of a cylinder of radius r, height h, is  $\pi r^2 h$ 

Volume of a sphere, radius r, is  $\frac{4}{3}\pi r^3$ 

Fish ponds can be either hemispherical or cylindrical.

hemispherical pond

cylindrical pond

1 (a) A hemispherical pond has radius r metres.

When r = 3, show that the volume of the pond is  $18\pi \,\mathrm{m}^3$ .

- **(b)** A cylindrical pond has a radius of d metres and a depth of d metres. Show that the volume of this pond is  $\pi d^3$  cubic metres.
- (c) The radius and the depth of the cylindrical pond in **part** (b) is the same as the radius of the hemispherical pond in **part** (a).

  Show that the cylindrical pond holds more water than the hemispherical pond.
- (d) A hemispherical pond of radius r metres has the same volume as a cylindrical pond of radius and depth d metres.

Show that 
$$d = \sqrt[3]{\frac{2}{3}} r$$
.

						9						
2	The	o wai	nts to work	out how man	ny fish he c	can put in	a pond.					
				A fish need	ds 5 litres c	of water f	or every 0	.1 cm of it	s length.			
	(a)			ngth of 15 fis er of cubic m			d for thes	e fish.				
	(b)			h in the pond or the number								
	(c)	The	o's pond ha	as a volume o	of $20 \mathrm{m}^3$ .							
		(i)	Use your in this pond.	model to find	I the maxir	num num	ber of fis	h, of avera	age length	24 cm, tl	nat can be	e put in
									••••			•••••
		(ii)	If Theo's p	pond is hemis	spherical fi	nd its rad	ius.					

(iii) If Theo's pond is cylindrical, and the radius and depth are the same, find its radius.

.....

.....

3	Theo decides to have a cylindrical pond.
	The radius, r metres, does not have to be the same as the depth, d metres.

(a) For a pond with volume 20 m $^3$  find a model for the depth, d, in terms of r.

.....

**(b)** Sketch the graph of *d* against *r* for  $1 \le r \le 5$ .

(c) What practical problem is there when the radius is less than one metre?

(d) Find the radius of a pond when the depth is 1 m.

4	The	e water level must be 30 cm below the top of the sides of the pond.	
	(a)	Modify your model in question 3 (a).	
	(b)	Explain how this affects your graph in question 3 (b).
