

CRUSTACEANS

1 Fig. 1.1 shows a woodlouse.

Fig. 1.1

(a) (i) Name the invertebrate group to which this animal belongs.

..... [1]

(ii) Describe **two** features that are characteristic of this invertebrate group.

1

2 [2]

Small invertebrates such as woodlice respond to different environmental conditions.

24 woodlice were placed in a choice chamber linked by a connecting passage, as shown in Fig. 1.2.

12 of the woodlice were placed in the damp area on one side of the choice chamber; the other 12 were placed in the dry area on the other side of the choice chamber.

Fig. 1.2

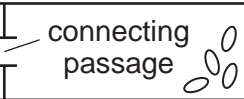

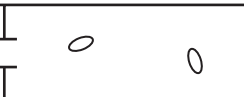

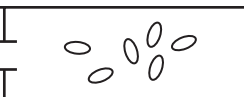

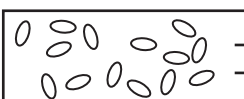

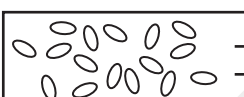

After 5 minutes the number of woodlice in each area of the chamber was recorded.

The woodlice were released into their natural environment.

This procedure was repeated **four** more times using different woodlice.

The results are shown in Table 1.1.

Table 1.1

trial	positions of woodlice		number of woodlice in the damp area	number of woodlice in the dry area
	damp area	dry area		
1		
2		
3		
4		
5		
	total	
	mean	

(b) Complete Table 1.1 by:

(i) counting and recording the number of woodlice in each area of the choice chamber for each trial;

[2]

(ii) calculating the total number of woodlice and the mean for each area.

[2]

(c) Draw a pie-chart on the diagram below to show the mean number of woodlice in each area of the chamber. Give a key to identify the areas.

Key

[2]

(d) Explain how the behaviour of the woodlice would help them to survive in their natural habitat.

.....
.....
.....
.....
.....
.....

[3]

(e) Suggest how you might improve this investigation.

.....
.....

[Total: 15]

MARKING SCHEME

(a) (i) arthropod / crustacean; [1]

(ii) jointed / segmented limbs / legs;
segmented body;
exoskeleton;

for crustacean:
compound eyes;
2 pairs of antennae;

[Max: 2]

(b) (i)

damp	dry
20	4
22	2
18	6
14	10
16	8

[2]

(ii)

	damp	dry
total	90	30 ;
mean	18	6 ;

[2]

(c) pie chart – 2 sectors 3/4 and 1/4;
key / label;

[2]

(d) preference for humid / damp conditions;
(usually) cooler;
stop drying out;
keep respiratory surfaces moist;
find their food / nutrients in damp conditions;
(damp conditions under objects) give protection from predators / shelter;
AVP;

[max 3]

(e) same species / type / size / age of woodlice;
all animals healthy / not damaged;
control of (1) variable (e.g. temperature / humidity / apparatus)
AVP;

[max 3]

[Total:15]
